Indonesia Economic outlook

* Optimistic that the economy in the third quarter of 2009 to remain high because of the increased investments since the second quarter of 2009 of 7.6% growth compare to 3.5% in the first quarter. Export in the second quarter of 2009 grew by 14.4%, compared to the first quarter which grew 12.4%.

* Indonesia’s economy is predicted to grow by 6% by considering the global economic downturns and reserving development priorities already planned in Government Action Plan 2009: inflation rate 6.2%, exchange rate Rupiah 9.400/USD, interest rate 7.5%, ICP USD 80/barrel and political compromises achieved in the form of macro-economic assumptions between the Government and Parliament.

* Economic stimulus package of USD 5 billion, especially to address the looming impact of the current global financial crisis.
International Monetary Fund (IMF) praised the economic strength of Indonesia in the midst of the flaming of the global crisis owing to the strong fundamentals and good policy response.

1. Private consumption supported by a package of fiscal stimuli has already protected economic growth of Indonesia to remain positive and including the highest in Indonesia.

2. Financial sector has recovered from the impact of the flaming of the world financial market in the beginning, while the investors’ sentiments have already improved for the last several months.

3. Economic growth in 2009-2014 is projected to improve and GDP will be more than 6% in 2009.

4. Under the leadership of President Susilo Bambang Yudhoyono and Vice President Boediono, the economic growth will be able to reach 9%.

5. Next 5 years, the Indonesian economic growth will be parallel with countries which have fast economic growth such as: Brazil, India, China and Russia.

Impact of the bomb explosions in the JW Marriot and the Ritz Carlton Hotel on 17 July 2009

1. The government will not revise the economic growth of Indonesia for 2009 and has strong economic fundamentals.

2. The development of various economic indicators a few days after the bombing showed relatively normal condition. The government guarantees the smoothness of flow of goods by raising the vigilance at the airports and the seaports as well as gives protection for the confidence of the economic doers.

3. Foreign investments in Indonesia did not receive a negative blow from the consequences of the bombing. Foreign investors think in a long term, and the bomb incident is temporary, so that the criterion for long term investments was not worsened. The bigger investments are more influenced by the macroeconomic signals.

4. Inflation in July 2009 between 0.2-0.5%, while in July 2008 was 1.37%.

5. Only a travel advice from several countries issued for being careful when visiting Indonesia.

6. No cancellation of the trips by Bulgarian citizens to Indonesia. No outflow of Bulgarian from Indonesia as a consequence of the bomb tragedy.

7. Global travel magazine *Travel and Leisure* name Bali its Best Island in the World in 2009 beating out other unique islands like the Galapagos islands in Ecuador, Kauai in Hawaii and the Maldives. The United Nations World Tourism Organization for Asia Pacific said that Indonesia’s resilience in the face of tragedy was a proven value based on the figures achieved in the tourism sector. “Tourist arrivals, especially to Bali, are on the rise.”
