FAX: (54 11) 4342 3740

Contact: Mariana Rodriguez Zani

E-mail: rodriguezani@convergenzialatina.com

WEB: www.convergenzialatina.com

Services / Products: Convergenzialatina is the main source of information in the Latin American and Caribbean telecommunications market. Convergenzialatina is a company with five years of track experience, made up of the most specialized analysts and reporters in the region. Convergenzialatina provides on-line information daily, 20 theme analyses per month and periodic statistics on

countries throughout the world. Convergencialatina also publishes different maps that open different Latin American telecommunications segments with icons on the following: fixed telephony, data, Internet, mobiles and satellites. Convergencia Wireless is an information service for Convergencialatina subscribers on current trends in fixed wireless and mobile technologies throughout Latin America. Since 2004 Convergencialatina Wireless has offered extensive weekly articles about business models, competition status and regulation; from an unbiased point of view regarding standards. It also includes a summary of the main weekly news articles regarding the segment, organized by countries and specific topics. LatSat is the first and only news service on the Latin American satellite market to be reported within the region. Since 2003 LatSat has offered extensive weekly articles about what is going on today in the satellite business and trends that follow both in the space segment as well as on land. It also offers a summary of the most important weekly events in the segment, organized by topics: telecommunications and media.
