

Real life applications of blockchain by LimeChain

Blockchain consulting and development

We don't develop blockchain promises, we develop blockchain results.

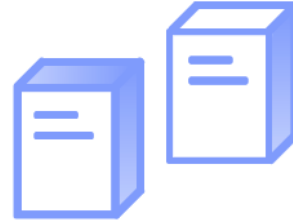

Services

Private and Public Blockchain Development

We use open shared ledgers like Ethereum to publically store, validate, and certify the information your business needs. Develop contracts which automate their own execution and enforcement.

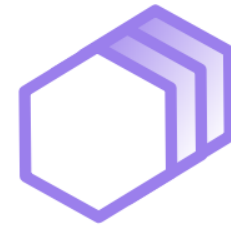

[LEARN MORE >](#)

Smart Contracts Development and Audit

Develop contracts which automate their own execution and enforcement. Done well, they're more secure than a traditional contract, save you money by eliminating middlemen.

[LEARN MORE >](#)

ICO and Crowd Sale Services

Leverage our deep knowledge and experience building out the technical side of ICOs to securely raise the funds your business needs to thrive.
