## Invitation - Westinghouse Supplier Summit

We welcome the recent decision of Bulgarian Energy Holding EAD (BEH EAD) to enter into exclusive talks to advance the opportunity to develop and construct an **AP1000**<sup>®</sup> nuclear power plant for Kozloduy Unit 7 in Kozloduy, Bulgaria.

Westinghouse Electric Company's newest plant design – the **AP1000** pressurized water reactor (PWR) – offers exciting opportunities for companies to supply the products and services that are required for plant construction. Through our "We Buy Where We Build™" approach, Westinghouse seeks to maximize the role of suppliers located in the countries where **AP1000** plants are developed.

With that said and following your face-to-face meeting with Westinghouse representatives this week, Westinghouse would be pleased and honored to have you as one of the imminent co-sponsors of our Supplier Summit on **27 February 2014**. Westinghouse will present its views on nuclear new build opportunities and supply chain strategy in Bulgaria, including the process to qualify suppliers. Following the event, interested companies are invited to discuss opportunities and challenges in Bulgaria and elsewhere and will be able to interact individually with our supply chain and business development representatives.

We have chosen to hold the Supplier Summit at the Radisson Blu Grand Hotel (4, Narodno Sabranie Square, 1000 Sofia). The event will be conducted in both English and Bulgarian (simultaneous translation).

### Draft Program

08:30 – 09:00 Registration  
09:00 – 09:50 Welcome & Introductory Messages  
09:50 – 10:10 Overview **AP1000**<sup>®</sup> Plant Design and Opportunities
