No. 100

Dated 06.05.2021

### **Delegation of the European Union**

We would like to express our highest consideration to you, and ask for your attention.

The “Kaganat onimderi” LLP is planning to construct an alumina plant in the Republic of Kazakhstan.

Our company, being a subsoil user, is currently conducting geological exploration works at the major aluminum ore deposit (bauxite) in Kazakhstan. The deposit’s reserves account for 44 900 000 tons. Following the geological exploration works it is planned to increase the aluminum ore reserves by 60 000 000 tons.

We would like to ask for your assistance in attracting investors from the European Union countries to be involved in the plant construction project based on the raw material base of an aluminum ore deposit.

Should you be interested in, we stand ready to provide you with further information.
